

It has recently been announced that a new high school may be built in your neighbourhoods . Do you support or oppose this plan?

School is an important place that should be everywhere so that until all the students can study without having the issue of far distance, but it the school must organize that has built at suitable place in which not only are there are not many houses ,but also there is a soothing environment for children who study at school.For these reasons that I want to refer to, I do not like anyone to build a school in our neighbourhood. Firstly, school can produce a lot of noise. Secondly, it can make a place crowded place.

First, children when come to school and see their friends at break ,so appear a lot of noise is made and people who live near school cannot have soothing moments, especially, when a home has a patient may have serious problems with it.

Second,it is usual and natural that when school has been established made, as a result of this, that place which school is in it, will change to a crowded place with a lot of cars and people especially when it's closing time finish and thus their parents intend to pick up bring their child, so neighbours will have a crowded street that can make them angry.

To sum up ,I completely oppose ~~pppose~~ by it and in my view, building a school creates /has problems that someone who starts s to establish it, must take get-notice to neighbours into consideration.
